

*We're looking for approximately 20 New England Grows exhibitors who are willing to have their booth (and plants) be a stop on the Essentials of Plant ID Challenge tour.*

Answering the call for a practical way to learn plant identification – this innovative learning experience at New England Grows provides a self-guided, plant ID challenge on the tradeshow floor. The Essentials of Plant ID Challenge is open to all New England Grows visitors and is a great way to showcase your plant material.

If you are interested in including your company, please let us know as soon as possible. Participation is limited, so don't miss out. Thanks, in advance, for your help with this exciting educational opportunity!
